NOTES

- \* Drainage pipe sizes (where shown) have been gauged from the surface for safety reasons and should be regarded as approximate only.
- \* Tree species (where shown) should be treated with caution and expert identification is advised.
- \* Although this is a digital survey the accuracy and amount of detail shown is only commensurate with the graphical scale of mapping as specified. Care should be exercised when working to larger scales.
- \* Visible features in the vicinity of the boundaries as shown above, may not represent the extent of legally conveyed ownership.
- \* Whilst every effort has been made to achieve accuracy on this plan, CRUCIAL clearance dimensions, levels and invert levels should be checked prior to design and construction.
- \* Kerb levels have been taken in the bottom of the channel.
- \* Areas of dense undergrowth cannot be surveyed. In detail, these areas will be shown in outline only and marked as 'dense undergrowth' on the plan.
