

Tree schedule (BS5837)

38 Queens Road

| Tree ID | No. Species | Height (m) | Stem diameter (cm) | No. of Stems | CROWN SPREAD (m) | | | | | | | | Crown clearance (m) | L.B. (m) | Life stage | Condition Notes Recommendations | Survey date | RPA (m ²) | RPR (m) | Life expectancy (yrs) | BS Category |
|---------|----------------------------------|------------|--------------------|--------------|------------------|----|-----|----|-----|----|-----|----|---------------------|----------|--------------|---|-------------|-----------------------|---------|-----------------------|-------------|
| | | | | | N | NE | E | SE | S | SW | W | NW | | | | | | | | | |
| Tree T1 | 1 Acer pseudoplatanus (Sycamore) | 9.0 | 30 | 1 | 2.0 | | 2.5 | | 2.5 | | 2.5 | | 5.0 | | Early Mature | Structural condition Fair. Physiological condition Fair. Access to inspect base - Not possible. Possibly multi stemmed Dimensions estimated due to no access Unremarkable tree, probably self sown | 06/03/2020 | 40.7 | 3.6 | 20-40 | C1 |
| Tree T2 | 1 Acer pseudoplatanus (Sycamore) | 9.0 | 30 | 1 | 2.0 | | 4.5 | | 4.5 | | 2.5 | | 5.0 | | Early Mature | Structural condition Fair. Physiological condition Fair. Access to inspect base - Not possible. Dimensions estimated due to no access Unremarkable tree, probably self sown First lateral branch to east attached at 4.5m 40mm diameter | 06/03/2020 | 40.7 | 3.6 | 20-40 | C1 |
| Tree T3 | 1 Cupressus sp. (Cypress sp.) | 11.0 | 40 | 1 | 4.0 | | 5.6 | | 4.5 | | 4.5 | | 1.8 | | Mature | Structural condition Fair. Physiological condition Fair. Access to inspect base - Not possible. Deadwood - Minor. | 06/03/2020 | 72.4 | 4.8 | 40+ | C1/C2 |
| Tree T4 | 1 Cupressus sp. (Cypress sp.) | 11.0 | 45 | 1 | 4.5 | | 5.5 | | 2.0 | | 3.5 | | 2.0 | | Mature | Structural condition Fair. Physiological condition Fair. Access to inspect base - Not possible. Deadwood - Minor. Suppressed crown - Minor. Historic wound on stem at 1.8 to 2.2m, callous growth formed | 06/03/2020 | 91.6 | 5.4 | 20-40 | C1/C2 |

Stem **green** Estimated value

Stem **AVE** Average stem diameter for tree groups

Stem **COM** Combined stem diameter in accordance with BS5837

L.B. Height of lowest branch attachment (m) - where relevant

The survey information in this schedule has been gathered following a BS5837 survey for planning purposes. Where hazardous trees have been noted recommendations for works may have been made but this survey cannot be relied upon as a full health and safety assessment of the trees.

Table 1 of BS5837 (2012)

Cascade chart for tree quality assessment

| Category and definition | Criteria (including subcategories where appropriate) | | | Identification on plan |
|--|--|--|--|------------------------|
| Trees unsuitable for retention (see note) | | | | |
| Category U Those in such a condition that they cannot realistically be retained as living trees in the context of the current land use for longer than 10 years | <ul style="list-style-type: none">* Trees that have a serious, irremediable, structural defect, such that their early loss is expected due to collapse, including those that will become unviable after removal of other category U trees (e.g. where, for whatever reason, the loss of companion shelter cannot be mitigated by pruning)* Trees that are dead or are showing signs of significant, immediate, and irreversible overall decline* Trees infected with pathogens of significance to health and/or safety of other trees nearby, or very low quality trees suppressing adjacent trees of better quality NOTE Category U trees can have existing or potential conservation value which it might be desirable to preserve; see 4.5.7 | | | RED |
| | 1 Mainly arboricultural qualities | 2 Mainly landscape qualities | 3 Mainly cultural values, including conservation | |
| Trees to be considered for retention | | | | |
| Category A Trees of high quality with an estimated remaining life expectancy of at least 40 years | Tree that are particularly good examples of their species, especially if rare or unusual; or those that are essential components of groups or formal or semi-formal arboricultural features (e.g. the dominant and/or principal trees within an avenue). | Trees, groups or woodlands of particular visual importance as arboricultural and/or landscape features. | Trees, groups or woodlands of significant conservation, historical, commemorative or other value (e.g. veteran trees or wood-pasture). | GREEN |
| Category B Trees of moderate quality with an estimated remaining life expectancy of at least 20 years | Trees that might be included in category A, but are downgraded because of impaired condition (e.g. presence of significant though remediable defects, including unsympathetic past management and storm damage), such that they are unlikely to be suitable for retention for beyond 40 years; or trees lacking the special quality necessary to merit the category A designation. | Trees present in numbers, usually growing as groups or woodlands, such that they attract a higher collective rating than they might as individuals; or trees occurring as collectives but situated so as to make little visual contribution to the wider locality. | Trees with material conservation or other cultural value. | BLUE |
| Category C Trees of low quality with an estimated remaining life expectancy of at least 10 years, or young trees with a stem diameter below 150 mm | Unremarkable trees of very limited merit or such impaired condition that they do not qualify in higher categories. | Trees present in groups or woodlands, but without this conferring on them significantly greater collective landscape value; and/or trees offering low or only temporary/transient landscape benefits. | Trees with no material conservation or other cultural value. | GREY |
