Letter or Email Response:

Dear EFDC, Very concerned to note proposed development of high density housing as part of the Draft Local Plan and potential impact on local amenities (green space for public use and car parks) in Loughton / Debden area. We need to protect the existing public open space , and retain the benefits of recreational areas which positively contribute to well being of residents . Loss of existing car parking facilities is also of concern, there is insufficient provision as it is!. The proposed developments will lead to significant loss of amenity and impact the character of the area negatively. How will the local support services- schooling, medical , policing, leisure and transportation links (tube, road network etc) cope with the proposed increase in households and number of people - many of these aspects, the provision of which is already stretched, are specifically outside EFDC and Essex CC control ? I think this proposed plan is ill- conceived and should not be pursued. I am squarely in opposition. **...REDACTED...**
