Subject: Bridge Hill, Proposed building (EPP R1)

I've been looking at your plans for building behind (EPP R1).

There is a field , which at the moment is privately owned. In order to access the field, there is an alleyway between the cottages in Bridge Hill.

According to your plan, you have acquired the field, will you have to knock down some of the cottages in order to create a road?

If this is the case, how do you propose to improve the road in Bridge Hill? At the moment it gets very congested with commuter parking and school parking. This road is very dangerous because there are blind bends in the road mainly caused by parking, and cars travel along at incredible speeds.

Many thanks.

Kind regards

Pauline Lazenby
