Monday 29th January 2018.

Dear Sir,

Please accept my letter of opposition and real concern for the new housing development proposed for 'a minimum' of nine hundred and fifty new houses on the site adjacent to Brook road, Bridge Hill and Ivy Chimneys; on the South Side of Epping.

I am fully aware of the need for new and affordable homes for the young people starting out. I do not however believe this location to be a safe environment for young families with babies and small children. It is right next to the Motorway with all the 'emissions' from the constant line of lorries, cars and other vehicles.

I have lived in Epping for the last seventeen years, close to this new proposed housing location. In that time I have experienced a chronic deterioration in my respiratory health. I am now making plans to move to an area with 'a safer air quality.'

yours faithfully,
