

To whom it may concern

I am writing to discuss just how important our green is to us for a number of reasons. Firstly from a business side [Redacted] to teach children knowledge and understanding of the world to experience the change of the seasons and to genuinely have fun. the children [Redacted] all live locally and enjoy getting out and making up games to play. [Redacted] play in the park during the school holidays which the children look forward to every time. This is a unique [Redacted] everything is walking distance.

From a personal view as a family we always look forward to joining the community for the yearly fun day which takes place every July. we often use the field to make memories [Redacted] from spring time kite flying to summer time water fights and picnics to autumn leaf picking for collages and rolling down the hill to winter snow sleighing. this field is so important to me personally its helped me [Redacted] over the years and i was really hoping to start our family traditions for generations to come.

This green is truly the heart of Debden and is loved by so many and especially by us .
