

☛ attention of Independent EFD local plan inspector

I'm writing this letter in regards to LOURS plan... we need this removed from your site and protected!!

We need our green areas for our children's future... this green is used daily by me and 1000's of other residents, it's also beautiful to look at!! Why is it other areas that were on local plan have been removed yet ours is still on there and Jessel green is used more frequently then any other!!

This green area is used by schools, children's groups, stay and play, local fun days and activities and the general public everyday... shouldn't children be allowed to grow up having use of green areas instead of it being built on!!

My family moved here from London in 1950's due to it being more green, more country side and my family have continued living here since the 1950's now that green could be taken away from generations that love and use it!!

When houses in Debden were first built Jessel Green was there for the community it was supposed to be for our use everyday and was made for us until Efdc took control... It was not here for people to build on!!

Wouldn't it be lovely to make use of that land we have for our community... for us to take care of, gardens for children to play, flowers to grow, park to play in but most importantly green area and space for children to be children, animals and wildlife to live and grow... we are not London full of buildings and fumes we are a small place and children need at least some greenery!!

Debden is already over crowded... all the schools are full and cannot take on extra children, the roads are so busy and traffic everywhere I have to walk as I can't get my daughter to school, the doctors surgery there is only one alone in Debden the other 3 in Loughton... they are full they have so many patients half of us can't get seen... if you add all these new houses... where will their children go to school and doctors to be seen and the roads and traffic are so bad where will their cars go... are you making extra roads, schools and doctors... NO as there is no space to do so!! Everywhere is being built on but no practical things what is needed!!

I have heard that EFDC have fallen behind on targets providing new housing and thats why they have made a plan to build on so many sites... why should we lose our one green space to fill up targets!! Also that [REDACTED] is behind the building on these new properties so that means... all the council tenants or homeless people wouldn't actually benefit from these houses either!!

I urge you please look into back ground of this plan... other plans have been removed to build in certain areas due to different councillors objecting as it is in their area... what about ours!!

We are over run, over crowded and as a community we just want our green to use and enjoy as we have for so many generations... for children's futures I hope you will consider to save Jessel green and listen to the 1000's of residents behind saving our green we are so passionate about... join us on our green and our community and see how loved it really is!!

Thank you
[REDACTED]
