**Please set out what change(s) you consider necessary to make the Pre Submission Local Plan legally compliant or sound, having regard to the test you have identified in the question above (Positively prepared/Justified/Effective/ Consistent with National Policy) where this relates to soundness. This is a once in a generation opportunity to ensure we have the right amount of housing for the young singles, couples, young families and older persons downsizing. It requires EFDC to contract with developers who understand the pressing need for new, highly sustainable properties that are affordable and not offered only subject to making high profits. The properties must assist the District's needs to support its wider community into the future, with requirements for starter flats and, if rented, with reasonable multi-year tenancy agreements. A high degree of market intervention is necessary and only those developers who are prepared to accept these rules should be involved.

**Please set out what change(s) you consider necessary to make the Pre Submission Local Plan legally compliant or sound, having regard to the test you have identified in the question above (Positively prepared/Justified/Effective/ Consistent with National Policy) where this relates to soundness. **If you wish to participate at the oral part of the examination, please outline why you consider this to be necessary:**

To reinforce and ensure that this is understood and accepted as the basic minimum of this plan.

EFDC needs to ensure that all parts of the District are linked and that public transport gets to all places on a regular frequency, particularly to hook up with the new expanded areas. As electric and hydrogen vehicles increase, including a requirement to see public transport upgraded with new technology, there is a need for the infrastructure to be strengthened to ensure a speedy transition and for all areas to be able to cope with increasing demand. The heritage railway must be linked into Epping underground station and the whole Epping station upgraded to assist public transport and the drop off facilities. The area needs to be comprehensively remodelled and during rush hour buses run to / from drop off points in the High Road to ensure less overcrowding with cars. North Weald needs to be linked by enhanced public transport to all other parts of EDF re new airfield business development and an enhanced shopping area. The scope for visitors to understand the ways to move from Epping station (including onwards to other leisure and recreational areas, e.g. Epping Forest visitor centres) need to be included in the remodelling, with proper bus areas / shelters away from the underground station entrance.

**Please set out what change(s) you consider necessary to make the Pre Submission Local Plan legally compliant or sound, having regard to the test you have identified in the question above (Positively prepared/Justified/ Effective/ Consistent with National Policy) where this relates to soundness. Yes, I wish to participate at the oral part of the oral examination

**If you wish to participate at the oral part of the examination, please outline why you consider this to be necessary:**

There is a lack of understanding about the chaos around Epping station and what is needed to be done for the future.

There is a lack of ambition around introducing more renewable energy into EFD. Although there is reference to this, EFDC should plan in renewables hubs linked to centres of new housing or employment and subject of plans to have as much renewables in the new areas as can be achieved.

To reinforce that all new areas must effectively capture as much water as possible and this be built into the sustainability package for developers. This is linked to the critical infrastructure requirements and planning around water runoff requirements.

There must be a clear demand on all the participating service providers that they enable the correct infrastructure both for the new developments and to ensure latest upgrades for all other existing residents. There must not be any compromise because it is considered more costly, but it is clearly to be included as state of art.

The plan must ensure that all areas can receive the maximum amount of local facilities possible in each specific area. If not, then each community must be properly connected to the facilities by proper transportation links that run at times to connect with the opening times of the facilities. It is also expected that developers will properly contribute to those additional facilities necessary with increased populations.
