This document has been created using information from the Council's database of responses to the Draft Local Plan Consultation 2016. Some elements of the full response such as formatting and images may not appear accurately. Should you wish to review the original response, please contact the Planning Policy team: ldfconsult@eppingforestdc.gov.uk

Letter or Email Response:

I'm writing to express my concerns of the proposed building on jessle green and surrounding areas. I cannot believe that you consider building on such a beautiful area of loughton I moved to loughton to be away from the hassle and bussle of inner London and also for a healthier life style I regularly take walks with my dog around jessle green and also with my grandchildren where we play games. The green open spaces that we are accustomed to will no longer be there. I feel my health will suffer as a result of higher pollution , as I walk alot to keep fit and it's because of the Greens that I feel I can do this. Also the police force is already suffering from lack of resources as I had an incident in September and the police eventually came to see me for the statement in December they then stated that they were being overwhelmed trying to keep up with everything. How would they cope with the over populated area that will most certainly bring more crime when the new developments are built? We would need more services such as health and education, transport and so on, how will the influx of people to the area be catered for within these sectors? As all these sectors are already at full capacity. Am i to understand that these types of facilities would not be considered straight away? Because the council has nothing to do with these sectors. How is the area going to cope! These services obviously will not be provided immediately. Parking is another issue there is not enough parking around loughton and you are considering building on car parks too, ridiculous! I do hope you think about this matter hard and long and your decision will be to keep the green spaces and it's not all about the money , let's keep it green as we all like it and that's why the majority of people moved here in the first place.
