

## Save Epping's Urban Green Community Spaces!

New homes are needed in Epping Forest District. But Epping Forest council plans to dig up treasured urban green spaces in Jessel Green and Limes Farm to build them.

Redrow is promoting a site in Theydon Bois which is an ideal alternative location for homes in Epping Forest District.

# An alternative to building on community spaces

**Redrow has an alternative. We're planning new homes at Theydon Bois:**

- A site with excellent connections to the Underground Station and Village Centre, reducing the need for residents to use their cars.
- Providing homes on currently inaccessible private land, not much-loved community space. We will open the site up, preserving and enhancing the green spaces in the area, and connecting the public rights of way.
- Helping Epping Forest meet its unmet housing need in a more sustainable way.
- A development with a dedicated green space for all, as well as green infrastructure corridors and woodland buffers.
- Creating a variety of attractive homes to meet a range of budgets.

## SHOW YOUR SUPPORT

Register at [www.redrowtheydonbois.co.uk](http://www.redrowtheydonbois.co.uk) to show your support, and send a message to Councillors that you oppose building on Jessel Green and Limes Farm.
